NIYONZIMA NSHUTI Fabrice

DevOps Engineer | IT Programmer
Phone: +250780484427 | E-mail: nshuti.fabrice09@gmail.com | GitHub: github.com/nshutifabrice09

I'm a DevOps Engineer with 4+ years of full-stack development experience. I specialize in bridging the gap between development and operations building applications end-to-end while automating infrastructure, orchestrating deployments, and creating systems that scale.

EDUCATION:

Bachelor of Science in Information Technology
Adventist University of Central Africa
Relevant Courses: *Java Programming, Data Structure and Algorithm, Linux Administration, Computer Networks, Software Engineering, Software Quality Assurance, Software Testing Techniques.*

WORK EXPERIENCE:

I. DevOps Engineer at GC Technologies ***Nairobi, Kenya***
-Period: November 2025-present

Key Responsibilities:

- Designed and optimized CI/CD pipelines using GitHub Actions, Jenkins, and GitLab CI/CD to automate testing, deployment, and release processes.
- Managed and maintained highly available production environments, ensuring platform reliability, performance, and operational stability.
- Provisioned and managed infrastructure using Terraform and cloud platforms, implementing Infrastructure-as-Code practices for scalable and repeatable deployments.
- Implemented monitoring, logging, and alerting solutions with Prometheus, Grafana, and ELK/Loki stacks to improve observability and accelerate incident resolution.
- Strengthened platform security through SSL/TLS management, access controls, disaster recovery, and server hardening.

II. Software Engineer & System Design at RWAiGHT ***Kigali, Rwanda***
-Period: October 2023-October 2025

Key Responsibilities:

- Architected scalable Spring Boot microservices with resilient communication patterns, fault tolerance, and high availability.
- Designed event-driven and data integration solutions using Kafka, PostgreSQL, and Redis to support reliable, low-latency workflows.
- Developed secured and reliable REST APIs with authentication and performance optimizations
- Led end-to-end system design, implementation, deployment, monitoring, and operational support for distributed backend services.
- Established CI/CD pipelines and quality standards using GitHub Actions, Docker, JUnit, Mockito, and SonarQube, improving deployment reliability and code maintainability.

SKILLS SUMMARY

- **Programming Languages:** Java, Python, C#, Shell Scripts
- **Operating Systems:** Ubuntu, Red Hat Enterprise Linux (RHEL), AlmaLinux
- **Cloud & Infrastructure:** AWS, Microsoft Azure, DigitalOcean, Terraform, Cloudflare
- **Containers & Orchestration:** Docker, Kubernetes
- **CI/CD & Automation:** GitHub Actions, Jenkins, GitLab CI/CD, Ansible
- **Monitoring & Observability:** Prometheus, Grafana, ELK Stack, Loki, Netdata
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Framework Technologies:** Spring Boot, Django, NestJS, Angular

CERTIFICATES:

- Advanced Network Operations 2.0 - Internet Society (2024)
- Linux Essentials Professional - Cisco Networking Academy (2022)
- Information Security – freeCodeCamp (2025)
- JavaScript and Data Structure Algorithms – freeCodeCamp (2025)
